

Education Research

The functionality, versatility, and ease of use of Snap Survey Software make it the ideal survey and evaluation solution for the education industry. Snap Surveys' products and services assist educational institutions to securely gather education-related data, analyze results, and produce actionable reports with ease of distribution to both internal and external constituents and stakeholders.

Education Evaluations and Surveys

Snap Survey Software offers a range of features that help our clients in education and training get the information they need to make better informed decisions. Colleges, universities, and educational research establishments are among the numerous educational institutions that use Snap Survey Software to evaluate students and staff, gather valuable feedback, and analyze a wide variety of activities, including:

- Course Evaluations
- Satisfaction Surveys
- Alumni Surveys
- Staff Evaluations
- Needs Assessments
- Longitudinal Studies
- Institutional Research Studies
- Testing and more...

Flexible Survey Software

Design professional evaluations and surveys

Create dynamic and engaging surveys in any language, which deliver an enjoyable and personalized experience for each respondent, across any size device.

Reach anyone, anywhere, with any mode

Gather feedback at educational institutions, in the classroom, at-home, or on-the-go with multi-mode capability: online, paper, mobile, or kiosk surveys. Our continuous Snap Mobile Anywhere interviewing technology enables uninterrupted interviewing, even in areas with Wi-Fi black spots.

Share analysis and reports

Share analysis and reports in any language with constituents and stakeholders, offline or online, with real-time updates. Produce personalized Snap Smart Reports for the entire organization, specific departments, or individuals, providing viewers with results customized to their role within the organization, including internal, external, or historical benchmarks.
